

Participants Needed for Research on a Supervision Scale for SMA Physical Therapists

The tools currently used in physical therapy to assess learners are proficiency scales which have several limitations. A new scale is being proposed that **discriminates between learners** and **improves reliability**.

FOR MORE INFORMATION OR TO ENROLL, CONTACT

Elizabeth Harding: erh2171@cumc.columbia.edu

You May Qualify If You Are:

- A state licensed PT
- Currently employed in any clinical practice setting
- Supervise PTs working with patients with SMA

Participation Involves

1. A **demographic survey** about you and your practice setting.
2. Completion of an **online survey** each time an activity is performed with a learner over a **2-month period**.
3. A post-study survey providing feedback on the supervision scale.
